

SEAMUS FREITAG

s@seamusf.com | Beaverton, OR | seamusf.com | linkedin.com/in/seamusf | github.com/SeamusFreitag

PROFESSIONAL SUMMARY

Operations leader with experience across logistics, procurement, and workforce training, moving into cybersecurity and IT. Completed a cybersecurity program and a documented live project covering web application testing, packet analysis, and malware investigation. Known for leading teams, resolving escalations under pressure, and building tools that improve how work gets done.

TECHNICAL SKILLS

Security: Burp Suite, OWASP Top 10, Wireshark, PCAP analysis, malware analysis, log analysis, Suricata, Snort, Nmap, Splunk, VirusTotal, Kali Linux, incident reporting

Fundamentals: CIA triad, IAM (SSO, MFA), PKI and certificates, OSI model, vulnerability management, incident response lifecycle

Systems & Networking: Windows, Windows Server, Linux, PowerShell, Bash, TCP/IP, DNS, DHCP, subnetting, Docker, virtualization (KVM, VirtualBox), AWS and Azure fundamentals

Development: Python, JavaScript, TypeScript, React, Node.js, HTML/CSS, SQL (T-SQL, SQL Server), Git/GitHub

Business: Microsoft 365, advanced Excel, SharePoint, reporting, process documentation, team leadership and training, vendor negotiation

TECHNICAL PROJECTS

CYBERSECURITY LIVE PROJECT | github.com/SeamusFreitag/Live-Project

2026

- Completed 21 offensive, defensive, and setup stories in two-week sprints, each documented as a professional incident report.
- Tested OWASP Juice Shop with Burp Suite, exploiting SQL injection authentication bypass, IDOR, mass assignment, missing rate limiting, and a poison null byte file filter bypass.
- Analyzed packet captures and IDS alerts in Wireshark to identify infected hosts and users, trace delivery chains, and confirm Trickbot, Qakbot, Ursnif, and Cobalt Strike activity.
- Triaged a live ransomware infection on a Windows 10 image, identified Jigsaw by PE metadata and hash lookup, recovered encrypted files, and removed the malware.

PORTFOLIO WEBSITE | seamusf.com

2026

- Built a Node.js static site generator that mirrors project READMEs from GitHub, deployed on Cloudflare Pages.
- Hardened with a strict Content Security Policy, HSTS, and security.txt with a PGP key for vulnerability disclosure.

PROFESSIONAL EXPERIENCE

PINNACLE PRO LOGISTICS

July 2023 - Present

Operations Manager

May 2026 - Present

- Direct daily office and logistics operations for a team of 10+ employees, balancing staffing, workflow priorities, customer needs, and time-sensitive issues.
- Serve as the first point of escalation for complex service issues, coordinating resolutions across customers, carriers, and internal departments.
- Partner with the General Manager on account strategy and business development, contributing to a 25% increase in monthly revenue within the first month and sustaining that level.
- Coach and train employees, lead weekly team huddles, and negotiate core carrier rates balancing cost, capacity, and service quality.

Pricing Analyst

July 2024 - May 2026

- Selected to assume interim Operations Manager responsibilities during a leadership absence, maintaining team priorities, workflow execution, and escalation management.
- Prepared competitive shipment quotes using lane data, market conditions, carrier costs, and margin requirements, and improved quote response times by refining quoting procedures and handoffs.

Operations Specialist

July 2023 - June 2024

- Designed and implemented Excel-based operational tools that standardized business information and remain in active use within the company.
- Resolved shipment delays, damages, tracking discrepancies, and compliance issues using Aljex, MacroPoint, and Microsoft 365.

AMAZON

2021 - 2023

Learning Ambassador

- Delivered more than 750 hours of hands-on process training to groups of 10 to 15 associates, improving accuracy and productivity.
- Onboarded more than 200 new employees and served as a floor-level escalation point for process and safety issues.

MEDUSA DISTRIBUTION

2016 - 2020

Procurement / Inventory Analytics

- Built Excel inventory tools that improved forecasting and stock visibility and identified excess inventory.
- Managed supplier relationships and negotiated pricing, payment terms, and delivery schedules to protect margins.

EDUCATION

The Tech Academy, Cybersecurity Program

September 2026

Belleville High School, High School Diploma

2012
